- Fraud trends Whaling Scams Payment
 Redirect targeting First Nations Local Gov't.
- Ransomware
- Prevention Initiatives

Looking to the future...

We want to hear from you.

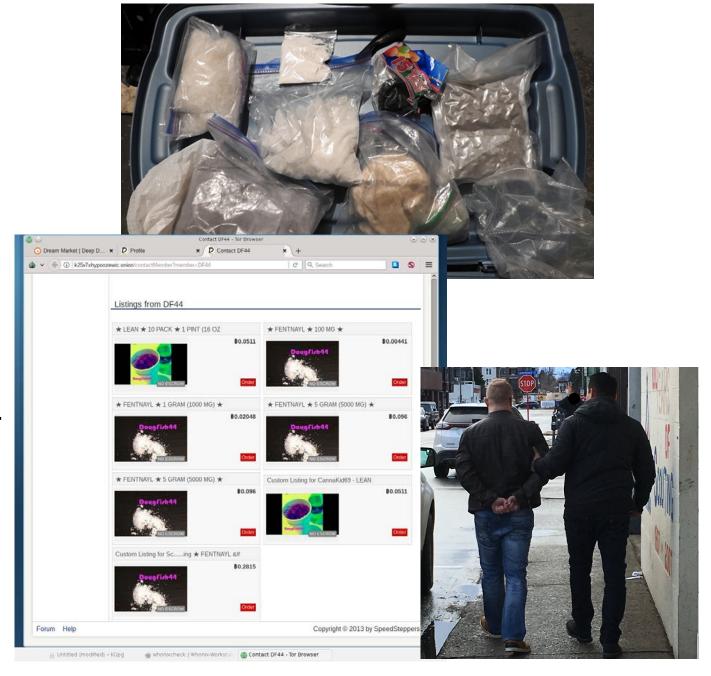

Cybercrime Investigative Team Vancouver

Beginning

Dark Web Investigations

- In 2016 RCMP drug investigators were working on the dark web to uncover and arrest fentanyl traffickers
- Online undercover operations using Linux virtual machines, Tor and Bitcoin for interaction and purchases
- There were a number of successful projects

Transition

Cybercrime Operations Group

- I submitted a business case to form a team solely focused on cybercrime
- The team was formed with three assets from the dark web team
- The team was created at the beginning of the covid19 pandemic lockdowns in Canada

- During the lockdown organization was difficult, it was difficult to network and hard to get traction
- The team built a remote workflow
- Grew to six regular members, two analysts and one Civilian Cybercrime Investigator

What is our #1 concern in cybercrime today?

Organized Crime

Initial Access

Network access brokers

- Initial access brokers use tools like gootloader to gain a foothold in the system
- The threat actor maintains persistence in the system
- Access is advertised and sold via clear web, dark web, Telegram...
- The transaction is completed via cryptocurrency

Ransomware

Global Organized Crime

- Bad actors use exploits to access a network in order to encrypt or exfiltrate data and demand ransom
- This is international organized crime on multiple levels
- They can be basic or very highly sophisticated and organized
- Dark and clear web based

Facilitators

Phishing as a Service

- Phishing being provided as a service to other criminals
- Phishing kits and full online workspaces are offered
- Sales and customer service via Telegram channels and bots
- Highly organized and facilitated by cryptocurrency

Cryptocurrency

Global Finance

- Cryptocurrency facilitates global organized crime
- Ransomware, PaaS and coordination between organized crime groups is funded by cryptocurrency
- The majority of our work comes back to cryptocurrency and the ease in which it works

Kootenay Family Place

In appreciation of our speakers today and with thanks for your contribution, UBCM has made a donation to the Kootenay Family Place. Kootenay Family Place is passionate about serving the needs of children, youth and families throughout the West Kootenay Boundary region through its services of early intervention, childcare, and providing a safe gathering place.
